

Programmer Studio 6.0

SOFTWARE DEVELOPMENT KIT

The Agilio™ P4C SDK 6.0 accelerates solution time-to-market by providing engineering teams with powerful design and development tools for software customization for the dataplane of Netronome's intelligent server adapters (ISAs). The Programmer Studio in the Agilio P4C SDK 6.0 is the industry's first P4 and C GUI-based Integrated Development Environment (IDE) for dynamically programming new and innovative networking capabilities on the Agilio CX and LX family of ISAs. Designs will benefit from an intuitive software development environment including tools for P4 development and a C-compiler both optimized for Netronome's Network Flow Processors (NFPs) offering a cycle-accurate simulator and extensive profiling capability for rapid debugging and prototyping.

Details

Programmer Studio IDE

- Supports Netronome Agilio CX and LX ISAs
- Project Creation
- Incorporation of all project components
 - Sources (P4, C and Assembly)
 - Headers
 - Macros
 - Standard Libraries
 - Scripts

Code Development Tools

- P4 Compiler
- Network Flow C Compiler (NFCC)
- Network Flow Assembler (NFAS)

Optional Flow Processing software

- Software Application Kits
- Software Building Blocks
- Sample Code (example applications)
- MicroC and Assembly Libraries
- Standard packet processing APIs

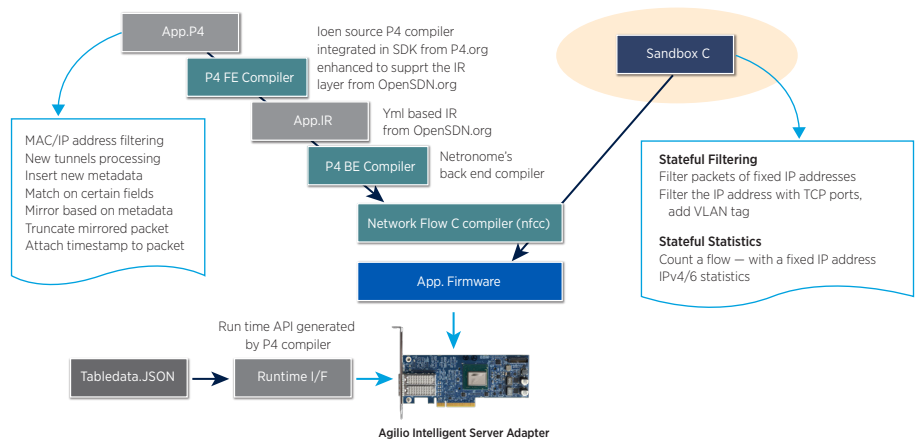

KEY FEATURES

- Optimized language processors designed to combine P4 or C-level abstraction and assembly level bare metal control and performance
- Cycle-accurate chip simulation presented in an intuitive graphical format, enabling efficient software development efforts
- Hardware debugger for Netronome Agilio ISAs using Programmer Studio
- Board support package (BSP) API integration for simplified and easier board bring up with Agilio ISAs
- User-friendly work environment with project-based source, header, macro, and script collection and tracking
- Throughput, code coverage and event profiling tools for precise optimization
- Reference applications for the Agilio CX and Agilio LX ISAs for project creation and simulations

- Linux Simulator and tool chain with Compiler, Assembler and Linker

Precision Flow Modeler Simulation

- Debug
 - Cycle-accurate data history
 - Cycle-accurate core execution history
 - Cycle-accurate event and queue history
- Profiling
 - Per-thread performance statistics
 - FIFO space coverage
 - Per-thread execution coverage profiling
 - Per-port frame and byte performance
 - Bandwidth estimates

Netronome's fully Integrated Development Environment (IDE) enables developers to speed the time-to-market for their products and applications.

Hardware Debug

- Debug Server enables direct connection between Programmer Studio IDE and HW targets
 - Netronome Agilio Intelligent Server Adapters (ISAs)
- Debug Server runs from host of off PCIe bus

Accessories

- Linker
- Loader
- BSP with system access API and Linux kernel host layer for Agilio ISA platforms.

Specifications

- Included in the Agilio P4C SDK:
 - Programmer Studio IDE
 - P4 Compiler
 - C Compiler (NFCC)
 - MicroC Libraries
 - Assembly Libraries
 - Precision Flow Monitor Simulation
 - Assembler (NFAS)
 - Linux Boards Support Package
 - Detailed documentation and user guides

Requirements

- 2.2 GHz (x86) with 8GB RAM and 2 GB of available hard drive space. 64 bit Windows 7 or Windows 8/8.1.
- Linux – Quad core i7 with CentOS 6 64-bit or Ubuntu 12.04.2/14.04.x 64-bit LTS with 8GB RAM.
